

# Electrophysiology Procedure Report

Date: 3/19/2002

---

Name: Shockly, Kenneth B.

Med. Rec. No.: 09876

Birthdate: 1/17/1949

Referring MD: James Peterson, MD

Indication(s) for Study: SVT

Electrophysiologist: Stan Batts, MD

Assisting MD:

The patient is a 53 year old, Hispanic, Male referred by James Peterson, MD for Evaluation of Supraventricular Arrhythmias. He has a history of underlying structural heart disease. The underlying heart disease is Dilated Cardiomyopathy.

Procedure Performed: Ventricular exam

**Procedure Summary:** The procedure was well tolerated by the patient. He experienced no complications and left the laboratory in sinus rhythm and in good condition.

A Ventricular exam was performed with a successful result.

At the end of the procedure the catheters and sheaths were removed and hemostasis was obtained.

**Plan:** The patient will be transferred to the CCU for observation.

It is recommended that the patient be started on Heparin 1000 units QD.

See the attached Procedural Information Report for details of the procedure.
