

FOR IMMEDIATE RELEASE
November 15, 2005

Coming soon - ICD & CarotidStent Registry Solutions for Apollo Advance!

OAKLAND, CA – LUMEDX is committed to adding the ACC - ICD Registry and the CarotidStent Registry information to Apollo as soon as possible.

As the No. 1 provider of ACC registry software, we will continue to develop registry solutions that keep pace with the latest ACC registries. We will start both projects as soon as the ACC publishes the specifications, and will race to have the products available to our customers as soon as possible.

Understanding that customers enter ICD implant information differently, we are creating solutions to accommodate everyone. We plan to include the ICD registry in two different modules:

- EP Advance
- Implantable Devices

The latest word from the ACC suggests the earliest the ICD specs will be released to vendors is at the end of November, possibly December, at which point we can begin building the software. Certification will start sometime after the first of 2006.

The CarotidStent Registry specifications will not be released to vendors until the spring of 2006. We are planning to add CarotidStent to our PVI module.

Call your Inside Sales person for pricing details.

ABOUT LUMEDX

With over 350 heart center clients worldwide, LUMEDX is the market leader in fully integrated cardiovascular information systems and the No. 1 independent integrator of cardiology information systems. LUMEDX offers the most proven, comprehensive package of clinical information tools, cardiovascular products, and services to help medical institutions enhance quality of patient care, reduce costs, streamline workflow, increase patient volume, and grow revenue.
