

**FOR IMMEDIATE RELEASE: JULY 30, 2007**

## **LUMEDX Clients Top Best Hospital Lists**

**OAKLAND, Calif., July 30, 2007** — LUMEDX Corporation, the market leader in providing fully integrated cardiovascular information systems, announced today that among those institutions honored in 2007 by four Best Hospital lists for their excellence in patient care, operations, and use of technology, a commanding number are LUMEDX clients:

- 49% among U.S. News & World Report Best Heart Hospitals
- 40% among 100 Most Wired Hospitals & Health Systems
- 26% among the Thompson 100 Top Hospitals  
(Formerly Solucient 100 Top Hospitals)
- 42% among the 100 Most Highly Integrated Healthcare Networks
- 56% among The Leapfrog Top Hospitals

"This year's Best Hospital lists continue to reflect the fact that when top hospitals choose a Cardiovascular Information System, they choose LUMEDX far more frequently than any other vendor," said Allyn McAuley, CEO of LUMEDX Corporation. "We are also very pleased that nearly half of the Top 100 Integrated Delivery Networks have chosen our products, indicating that our focus on integration of data across multi-campus enterprises is going to be increasingly critical to delivering higher quality cardiac and vascular care."

LUMEDX cardiology and vascular software enables heart centers to consolidate clinical, operational and financial data - both text and images - across the cardiology and vascular service lines, promoting fast, single-point-access to clean, precise information. LUMEDX offers the most proven, comprehensive package of clinical information tools and professional services to help medical institutions enhance quality of patient care, reduce costs, streamline workflow, increase patient volume, and grow profitable revenue.

critical role in helping hospitals meet many of today's challenges and opportunities, including pay-for-performance, gains-sharing, evidence-based medicine, greater competition, transparency in the marketplace, and new governmental controls. CVIS streamline both procedure and aggregate reporting, as well as help automate manual, redundant, and paper-intensive tasks. A CVIS acts as the necessary bridge between clinical practice, outcomes documentation, best practice integration and quality assurance. We believe efficient processes supported by health information technology can contribute to substantial improvements in quality of patient care, productivity, and profitability across the cardiovascular service line.
