

FOR IMMEDIATE RELEASE: DECEMBER 12, 2007

New Cardiology Software Helps Heart Centers Manage for Optimal Performance

OAKLAND, Calif., December 12, 2007 / PRNewswire/ — LUMEDX Corporation, the market leader in providing fully integrated cardiovascular information and imaging solutions, introduces CardioManager Performance Management System™, cardiology software that translates complex data - clinical, operational, financial - into accessible, actionable information. CardioManager's performance dashboards and on-demand reporting provide users with a high-level view of data and the ability to drill down for more detailed reporting.

A free CardioManager Information Kit with CD demo is available at:

<http://www.lumedx.com/cardiovascular/cardioManager/>

CardioManager integrates with LUMEDX's CardioStar™ Suite of cardiovascular information and imaging tools, delivering a robust and fully unified Cardiovascular Information Systems solution.

CardioManager enables CV team members to become performance managers by making it easier for users to view metrics, plans and reports in their respective areas. CardioManager can help users:

- Make better decisions by using robust tools that help users understand and act on their data
- Identify, understand and eliminate problem areas quickly through access to real-time data
- Direct and track resources to support priorities and CV service line strategies
- Manage for optimal performance of all the work taking place across the cardiovascular service line
- Drive accountability through effective team collaboration
- Deliver meaningful reports on time, easily, securely - over 200 standard reports available

According to LUMEDX CardioManager Product Leader Brandon Long, "What gets measured gets improved. CardioManager helps users answer core

performance management questions: ‘How are we doing? Why? What should we do to improve?’ In this way, good decisions drive other good decisions. The end result: better alignment, accountability and performance.”

ABOUT LUMEDX CARDIOVASCULAR SOFTWARE AND SERVICES

(<http://www.lumedx.com>) With over 500 heart center clients worldwide, LUMEDX is the market leader in fully integrated cardiovascular information systems and the No. 1 independent integrator of cardiology information solutions. Our CVIS play a critical role in helping hospitals meet many of today’s challenges and opportunities, including pay-for-performance, gains-sharing, evidence-based medicine, greater competition and transparency in the marketplace, and new governmental controls. Cardiovascular information systems streamline both procedure and aggregate reporting, as well as help automate manual, redundant and paper-intensive tasks, and act as the necessary bridge between clinical practice, outcomes documentation, best practice integration and quality assurance. It is our belief that efficient processes supported by information technology can contribute to substantial improvements in quality of patient care, productivity and profitability across the cardiovascular service line.
