## **LUMEDX Launches Latest Version of Real-Time Patient and Resource Scheduler for Healthcare Systems**

**OAKLAND, Calif., March 20 /PRNewswire/** — LUMEDX Corporation, a leading provider of fully integrated imaging and information system solutions, announces the latest version of its real-time patient and resource scheduler software, CardioSchedule™. CardioSchedule delivers real-time scheduling of patients, physicians, staff, rooms with drag and drop ease, delivering increased workflow efficiency, better resource utilization and substantial ROI.

A free CardioSchedule Information Kit is available at <http://www.lumedx.com/cardiovascular/cardioSchedule/index.asp>

CardioSchedule integrates with LUMEDX's CardioStar™ Suite of cardiovascular information and imaging tools, delivering a robust and fully unified Cardiovascular Information Systems solution.

CardioSchedule can help heart centers:

- Minimize the impact changes have on the heart center by communicating updates to the entire CV Services team and specialists in real time
- Reduce mistakes and ensures data integrity by decreasing manual data entry
- Maximize patient volume and workflow by enabling the CV Services team and specialists to access the schedule in real time and adjust accordingly
- Drive quality improvement, increases efficiency, and streamlines operations through analytical reports
- Enhance both the patient and physician experience by creating a real-time understanding of the continuum of care

According to LUMEDX Director of Product Management / QA and Lead CardioSchedule Product Manager, Rhonda Staton, "CardioSchedule improves communications and workflow dramatically by enabling users to view patients and resources in real-time and to schedule patients from multiple locations. CardioSchedule serves as a window into the daily operations of your department."
