VMware helps LUMEDX deliver critical business services to integrated healthcare systems rapidly and reliably

June 9, 2010, Oakland, CA - LUMEDX Corporation, a leading provider of fully integrated medical imaging and information systems, announced that it has joined the VMware Technology Alliance Partner (TAP) program. The VMware TAP program helps technology vendors integrate their products with VMware virtualization software, and deliver timely, joint solutions to mutual customers.

"LUMEDX understands that virtualization is fundamentally - and significantly -- transforming the economics and experience of IT services," said Bill Gazda, LUMEDX Vice President of Client Services and Operations. "VMware technology enables our customers -- integrated healthcare systems -- to rapidly and reliably deliver the critical business services that our solutions provide while lowering their total cost of ownership. Healthcare providers face growing demands to reduce costs, increase productivity and more effectively manage the explosion of data. Virtualization can play a key role in helping our clients meet these challenges. As a VMware TAP partner, LUMEDX is uniquely qualified to deliver turnkey solutions to our clients as well as solutions for their existing virtualization farms. The LUMEDX-VMware alliance:

- Speeds project implementation and promotes a faster go-live by significantly reducing the time it takes to prepare, customize and deliver systems.
- Gets actionable solutions into the hands of hospitals sooner, benefiting both healthcare providers and their patients.
- Enables hospitals to better manage the rapid proliferation of data and resulting storage demands.
- Reduces the costs and inefficiencies associated with multiple under-utilized servers.
- Supports 100% uptime, 24x7 processing and disaster recovery."

"We are excited to welcome LUMEDX as the newest member of the VMware TAP program," said Bernie Mills, senior director, alliance programs, VMware. "The VMware TAP program offers companies like LUMEDX the tools and resources they need to develop high-value solutions that meet the needs of our mutual customers."

With more than 1,400 members worldwide, the VMware TAP program works with best-of-breed technology partners to provide them a comprehensive set of VMware technical and marketing services, support, tools and expertise to deliver enhanced value to joint customers.
