LUMEDX Announces Official HIMSS20 Speakers

Client partner Duke University Health System and business intelligence thought leader to give presentations at annual innovation conference

Oakland, CA—Jan. 29, 2020—LUMEDX, a leading provider of healthcare analytics and cardiovascular information systems (CVIS), is pleased to announce that client partner Duke University Health System has been selected to present at the upcoming 2020 HIMSS Global Health Conference & Exhibition.

The education session by Jill Engel, Associate Vice President of Heart Operations, Nursing and Patient Care Services; and Joe Kelly, Director of Cardiovascular Informatics & Quality Improvement, is scheduled for Friday, March 13, at 10:45 a.m. in room W209C of the Orange County Convention Center in Orlando, FL. The 60-minute lecture may be eligible for credits from the Accreditation Council for Continuing Medical Education (ACCME). Visit www.himssconference.org/program/continuing-education/credits for more information.

“The Power of High-Quality, Interoperable Data” will focus on the role-based workflow solution that includes structured reporting, concurrent data abstraction, and analytics insights—developed in a partnership between Duke University Health System and LUMEDX—and how it is driving clinical and operational excellence. The solution, which puts information at providers’ fingertips, is currently being used in the cardiothoracic surgery department and the catheterization lab, with implementation in adult and pediatric echocardiography under way.

[HIMSS20](#) will be held March 9–13 and will bring together nearly 45,000 professionals from more than 90 countries for education and collaboration on innovation that is shaping the future of healthcare.

During the HIMSS20 [Big Data Symposium](#), a pre-conference program, LUMEDX Director of Business Intelligence and Analytics Matthew Esham will present “Managing Knowledge Hoarders, Deconstructing Departmental Silos, and Creating Data Context to Make Way for Business Intelligence Maturity.” Esham, a former cardiovascular service line manager at Christiana Care, will share some of the things he’s learned from working with more than 100 heart centers since joining LUMEDX in 2017.

The session will be held at 10 a.m. Monday, March 9, in room W308A at the Orange County Convention Center. The program has been approved for [ACCME credits](#).

LUMEDX will be hosting a full schedule of presentations at Booth 373 from industry innovators such as Dr. James Tcheng, Practicing Interventional Cardiologist at Duke University Health System and Professor of Medicine at Duke University; Rick Jones, RPH, Business Support Manager, Cardiovascular Service, Surgery and Pharmacy, at Orlando Health; and others. For more information or to schedule a meeting with a LUMEDX subject matter expert, please visit www.lumedx.com/himss-2020.

About LUMEDX

LUMEDX is the leading vendor of population health registry software in the cardiovascular space. In a partnership with Microsoft, the company offers HealthView Analytics (HVA), which uses the Azure Data Factory infrastructure to extract insights using clinical and financial data from your enterprise systems (EHR/HIS). These insights translate to real-world opportunities for hospitals to improve patient care and outcomes, as well as the bottom line. Learn more at www.lumedx.com.

About HIMSS

The Healthcare Information and Management Systems Society (HIMSS) is a global advisor and thought leader supporting the transformation of the health ecosystem through information and technology. As a mission-driven non-profit, HIMSS offers a unique depth and breadth of expertise in health innovation, public policy, research, and analytics. For more information, visit www.himss.org.
