FOR IMMEDIATE RELEASE

LUMEDX to Demonstrate Value of Advanced Analytics at Upcoming HIMSS18

Oakland, Calif.—Feb. 15, 2018—LUMEDX Corporation, a top cardiovascular data intelligence company, will show off the latest in advanced analytics and software solutions at the Healthcare Information and Management Systems Society (HIMSS) annual conference next month.

LUMEDX announced that HIMSS18 attendees who stop by Booth 12340, Level 1, Hall G, will have the opportunity to see firsthand how high-powered analytics tools can help heart and vascular centers improve outcomes and dramatically reduce costs.

"Our innovative technology mines existing data and turns it into relevant insights that decision makers can use to streamline workflows, improve productivity and better serve patients—all while keeping a close eye on the bottom line," said LUMEDX President and COO Chris Winquist.

"As we move away from fee-for-service and towards value-based payment models, performance metrics become crucial to the operations of any successful cardiovascular service line," he added.

Demonstrations of LUMEDX's analytics tools are available during HIMSS18. Schedule a meeting at http://www.lumedx.com/himss-request-meeting.aspx

The conference will be held March 5-9 at the Venetian-Palazzo-Sands Expo Center in Las Vegas, Nevada. More than 1,300 leading health IT vendors will be exhibiting and general education sessions will focus on 23 cutting-edge topics, including:

- Clinical and Business Intelligence
- Cybersecurity
- Population Health

For more information about HIMSS18, go to http://www.himssconference.org/

Founded in 1961, HIMSS is a not-for-profit organization dedicated to improving healthcare quality, safety, cost-effectiveness and access through the strategic use of information technology and management systems. It is headquartered in Chicago and has more than 70,000 individual members, over 600 corporate members, and more than 250 not-for-profit organizations.

LUMEDX is a leader in cardiovascular data intelligence and cardiovascular information systems (CVIS). In business for over 25 years, the company offers an end-to-end suite of software and services that enables meaningful analytics, high performance workflows, optimal integration of clinical and EHR data, and improved continuity of care. For more information on LUMEDX HealthView Analytics, the new analytics-driven Cardiovascular Performance Program or CVIS solutions, please visit http://www.lumedx.com.
